A-series
A-series
c
$K, \theta = 0, S_z = +1/2$
$K', \theta = 0, S_z = +1/2$
$K, \theta = \pi/2, S_z = +1/2$
shift vector, $R_y(\times 10^{-2}a)$
armchair-direction strain(%)
$K, S_z = +1/2$
light polarization angle
d
$K, S_z = +1/2$
$K, S_z = -1/2$
shift vector, $R_y(\times 10^{-2}a)$
armchair-direction strain(%)
e
current density, $j_y(\times nA/\mu m)$
light polarization angle
f
current density, $j_y(\times nA/\mu m)$
light polarization angle
